# Dutch Design

Crafted from cast aluminum, with the material's natural texture clearly visible. The bronze-colored finish collection is treated with a special patina, giving the lamps a lived-in appearance.

Combined with warm-colored, dimmable integrated LEDs, this collection embodies Frezoli's unique character.

Illuminate your interior with distinctive design and craftsmanship

# *Collection Of Ceramic Jug Lamps*

The pottery jars that we design for the jug lamps are handmade in a traditional way on a potter's wheel.

The lamp bases are baked in an oven and then coated in our own workshop in the Netherlands, giving them their weathered and special look.

Our new glazed JARRU models, are handmade in Portugal.
